DECLARATION

Commissioner of Patents P.O. Box 1450 Alexandria, VA 22313-1450

Sir:

- I, Ken Ohmura, hereby declare and say as follows:
- I make this declaration to supplement the declaration I signed on June 8, 2003 in this case (hereinafter the June 8 Declaration).
- The redispersion electro-conductivity of Examples 1-11 of the present invention and Examples I-IV of Cheng, as reported in my June 8, 2003 Declaration, were determined by the method described at pages 8-9 of the present Application.

- June 8, 2003 Declaration for the Yellow Toner of Cheng's Example (c) and Cheng's Example (d). In Cheng's Example (c), the Yellow Toner was washed in water in an amount 100 times the weight of toner and should have been labeled (B)** and in Cheng's Example (d), the Yellow Toner was washed in water in an amount 10 times the weight of toner and should have been labeled (A)*. Correction has been made herein by attaching a "Revised Table 3a" with these corrections. For ease of Examiner's review, a copy of Tables 4a and 5a are also attached.
- 4. As noted in my June 8, Declaration, the results from the sets of toners are reported in Table 5a. As can be seen in Table 5a, Cheng's material is clearly different from the present Invention and, specifically, it can be seen that, in the fine dot evaluation, the low temperature, low humidity color difference and in the high temperature, high humidity fogging there dramatic differences. It can also be seen that the difference between the low temperature, humidity and high temperature, high humidity for 10% dot density and line width is small for the present Invention while this difference is fairly large for Cheng.

It is declared by undersigned that all statements made herein of undersigned's own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements and the like so made are punishable by fine or imprisonment, or both, under section 18 U.S. Code 1001, and that such will false statements may jeopardize the validity of this Application or any patent issuing thereon.

Ken Ohmura

Dated: This //thday of November , 2003.
